

Tagua Town

Hello

I'm an animal from the **Tagua Town collectibles**

...and I live in this cute house, designed especially for me by the lovely Ruth at Campbell Cadey Architects.

Once upon a time, I wasn't an animal at all....

I was a **seed**, a real live tagua seed, growing on a Tagua Palm tree in the Amazon Rainforest in Ecuador, South America.

Then, one day..

I fell out of the palm tree and lay on the ground for what seemed like ages.

Eventually, I was picked up and taken to a workshop in Ecuador, where a man called Ronald saw my potential.

He started carefully carving and polishing me until I was transformed into this amazing **Tagua Town** animal!

I liked being a seed, but I love being an animal more!

I never thought I could be so beautiful.
