CANDLEMELEON PROPOSITION

NOT JUST ANOTHER CANDLE BRAND

Everywhere we are, we experience patterns. We see shapes. We feel textures. When the time is right, we choose to create our own spaces, design our own moods and experience our own comfort. Candles give a sense of warmth, security and hygge. But what they don't do—until now—is allow you to enjoy your favourite sensory prints.

Even if your space is a clean, minimalist zen aesthetic, when the lights go down and the self-crackling woodwick is lit, Candlemeleon allows you to relax into a sensory experience that can embody whatever you desire, from the wonderful world of architecture, to your favourite woodland setting inside, to even the swinging Miami beach vibes of the Art Deco era.

Endless possibilities allow us to help you have endless good times all in the comfort of your chosen space.
