The Story

## ABOUT US

We are married design-duo Alex Sommer and Laura Keller. In the spring of 2018, after more than two decades of working in the fashion industry (running our creative consultancy **2SOM studio** since 2004), we decided to apply our creative know-how to something a little different.

From a little man-cave concrete tinkering, inspiration was born. He inspired her with his concrete creations which made her start thinking about wax. Some girl-time candle-making experiments followed and after much R&D, prototyping, sampling and testing we can now assuredly say, HE is **Mr Concrete** and SHE is **Mrs Wax**.

We launched our unique modular, stackable collection of hand poured candles and concrete holders in 2019 and have since added a multi-functional vegan collection of container candles and diffusers, as well as extending the concrete collection to include a range of luxury tableware pieces.

This year our Modular Collection won My Gift of All Time at the annual Gift of the Year Awards and our Tableware Collection was Highly Commended.

All pieces are hand poured in small batches in our Suffolk workshop with absolute minimum waste and total respect for our surroundings.

We hope that you love what we do, because we absolutely love doing it.

*Mr. Concrete*

*Mrs Wax*

# CONCRETE&WAX

The Story

## OUR BRAND ETHOS

### Keeping it Local:

We sought out skilled local craftsmen to make our candle prototypes from layered plywood and our concrete prototypes from aluminium turned on a lathe.

The characteristics of the prototype materials are uniquely reflected in each product we pour using moulds we also make by hand in our workshop. Our pillar candles have unique, subtle horizontal surface ridges that reflect the plywood layers and the concrete has a smooth, luxurious, metal-like surface.

We source all our components from UK manufacturers or suppliers and hand-pour every item in small batches in our Suffolk workshop.

[Click](#) to watch the development processes for one of our products.

### The Cork Feet:

Each concrete holder sits on top of a 6mm deep cork foot. This cork foot serves 3 key purposes:

- 1) To protect surfaces and give stability to the product.
- 2) To hand-stamp our branding on.
- 3) To create the modular, stacking system because each cork foot fits perfectly and snugly into each holder.

Each piece in the tableware collection sits upon a cork base to protect surfaces and offer stability.

The cork has been sourced from a responsible UK supplier.

### Traceability:

Each candle has been tested to achieve the best burn we possibly can. On the base of each candle, beneath our embossed branding, is a hand-stamped batch code allowing for traceability of each ingredient back to the source, as well as detailed information about the manufacturing process (recipe, pouring temperature etc). All candles are fully CLP compliant.

### Our Footprint:

When working with a product like concrete, it's not easy to shout our eco-credentials from the rooftops. We do, however keep our footprint as small as possible, by sourcing locally, using recyclable materials where possible and having minimum waste (eg we turn any excess concrete into concrete sample discs or one-off holders and wax into tealights or wax melts).

### Intelligent Modular & Sustainable Design:

Our aim was to design a collection of pieces that allow customers to create unique candleware arrangements, so we designed a stackable, interchangeable collection of candles and holders that offer flexibility and creativity.

We fully embrace the fact that the concrete will always outlast the candle so each holder is also designed to fit any standard tealight and the pot lid can hold up to three.

### Unique Camouflage & Splatter Concrete:

Poured by hand by two people, there is no exact science in creating the camouflage design or splatter effect. The result is truly unique concrete. There will only ever be one of a kind.

The  
**CONCRETE**  
Collection

**Concrete Characteristics:**

\* Every piece of concrete has unique surface characteristics because of the drying process where tiny air bubbles can form, meaning there will always be slight imperfections. We embrace this, it is part of the design and makes each piece unique.

\* Each piece has a hand-stamped branded cork foot applied to its base.

\* A soft cloth is used to apply a natural wax/oil coating to the concrete surface to protect from marking.

- [Click](#) to watch me pouring.

The  
**WAX**  
Collection

**Candle Characteristics:**

\* All of our candles are hand poured in small batches and made from 100% natural wax.

\* A sprinkling of beeswax has been added to the soy wax to add strength to the pillar candles.

\* They have an integrated foot at the base which fits snugly into our holders, and gives a floating aesthetic.

\* The top edge of each candle is shaved by hand to achieve a smooth finish and each is then individually tissue wrapped.

\* All container candles are poured using a vegan blend of rapeseed and coconut wax. Wax melts and tealights are 100% soywax.

\* [Click](#) to watch me making candles.

FRAGRANCES:

Mrs Wax's guide to her fragrance selection

Lime, Basil & Mandarin

A long-loved favourite fragrance of mine and the perfume I've worn since 1997. Its citrus freshness is relaxing, yet invigorating. It conjures up memories of busy days and tropical escapes.

Tobacco & Oak

This fragrance was developed with Mr Concrete firmly in mind. An earthy aroma of smoky tobacco and dusty oak moss mixed with leather, spice and musk. It's very masculine, but not at all overpowering. Need I say more?

Sandalwood & Black Pepper

The most luxurious candle fragrance in our collection and very gender neutral. The sandalwood aroma evokes calm, black peppercorns throw a faint spiciness into the mix and citrus top notes add a fresh finishing flourish.

Amber Noir

A warming, intoxicating and mysterious fragrance. To Mr Concrete it provides a magical, tropical scent sensation, but it transports me to a mystical and exotic forest. Where will it take you?

Cherished Leather

An Italian leather market. The buttery softness of a nappa leather jacket or the squeak of a polished handbag; the fresh citrus and herbal aromas circulating around. Sophisticated, yet homely and completely unforgettable.

Curious Rose

Not overpoweringly floral, but deeply intriguing and rich with smoky undercurrents of oud wood. Intoxicating and sensual. If our blush concrete had a fragrance to it, then this would be it.

# CONCRETE&WAX

The Modular Collection

## MID HOLDER & CANDLE SET

(The satisfyingly compact one)

Not too wide, nor too skinny. Unsurprisingly this is our most popular ensemble. Proving medium is rarely mediocre. The holder is also designed to fit any standard tealight and can be stacked on top of our large holder, pot & plate. The candle can be burned on all of these holders too.

### Technical Info - CONCRETE:

Approx dimensions: W: 72mm x H: 66mm (inc. 6mm cork foot)  
Approx weight: 390gm

### Technical info - WAX:

The Modular Collection

## LARGE HOLDER & CANDLE SET

(The sturdy and rugged one)

This is the union that you just know is built to stand the test of time. The holder is robust and the candle weighty. The holder is also designed to fit any standard tealight and can be stacked on top of our pot & plate. The candle can be burned on these holders too.

### Technical info - CONCRETE:

Approx dimensions: W: 97mm x H: 46mm (inc. 6mm cork foot)  
Approx weight: 490gm

### Technical info - WAX:

Approx dimensions (total): W: 97mm x H: 90mm

## POT & 3-WICK CANDLE SET

(The big, bad-boy one)

What's not to like about a big heavy concrete pot with a 3-wick candle in it? They fit together harmoniously and are primed and ready to make a fantastic sideboard or table statement.

Both the base and the lid can also be used independently to hold any of our candles or a simple tealight in the base, or 1-3 tealights in the lid. The candle can also be burnt on our plate

### Technical info - CONCRETE:

Approx dimensions: W: 148mm x H: 136mm (inc. 6mm cork feet)  
Approx weight: 2350gm

### Technical info - WAX:

Approx dimensions (total): W: 118mm x H: 75mm

## SPLATTER COASTER SET

These coasters have a lovely lockdown story behind them, when one home schooling day Little Miss Concrete & Wax asked to pour concrete like Daddy instead of doing maths. The brief was to do it like Jackson Pollock and the result was truly inspiring (albeit very messy). Now, these have been poured by Mr Concrete, but he's not too proud to admit he took inspiration and direction from his little Miss when developing them.

Sold as a set of four, each coaster has a branded 1.5mm cork base to add stability and protect surfaces. Each set is delivered beautifully tissue wrapped and packed in our branded tube.

### Technical info:

## 'BRANCH' CANDLE & HOLDER SET

This concrete holder and soy wax candle promises to be a design classic of the future.

The hand poured concrete base perfectly immortalizes the base of a branch in bark texture and surface detail. It has been designed not only to fit the candle, but also to hold any standard tealight as well as a taper candle.

The candle follows the line of the branch to perfection (the prototypes were made from the same piece of wood) and also has all the surface characteristics of tree bark.

Each set is delivered packed into a 99% recycled and 100% recyclable luxury black card box. The box has removable branding to allow it to be reused by the customer. We plant a tree for each set sold.

### Technical info - WAX:

Approx dimensions (total): W: 65mm x H: 190mm

Approx dimensions (useable): W: 65mm x H: 175mm
