

MAKERS CABINET

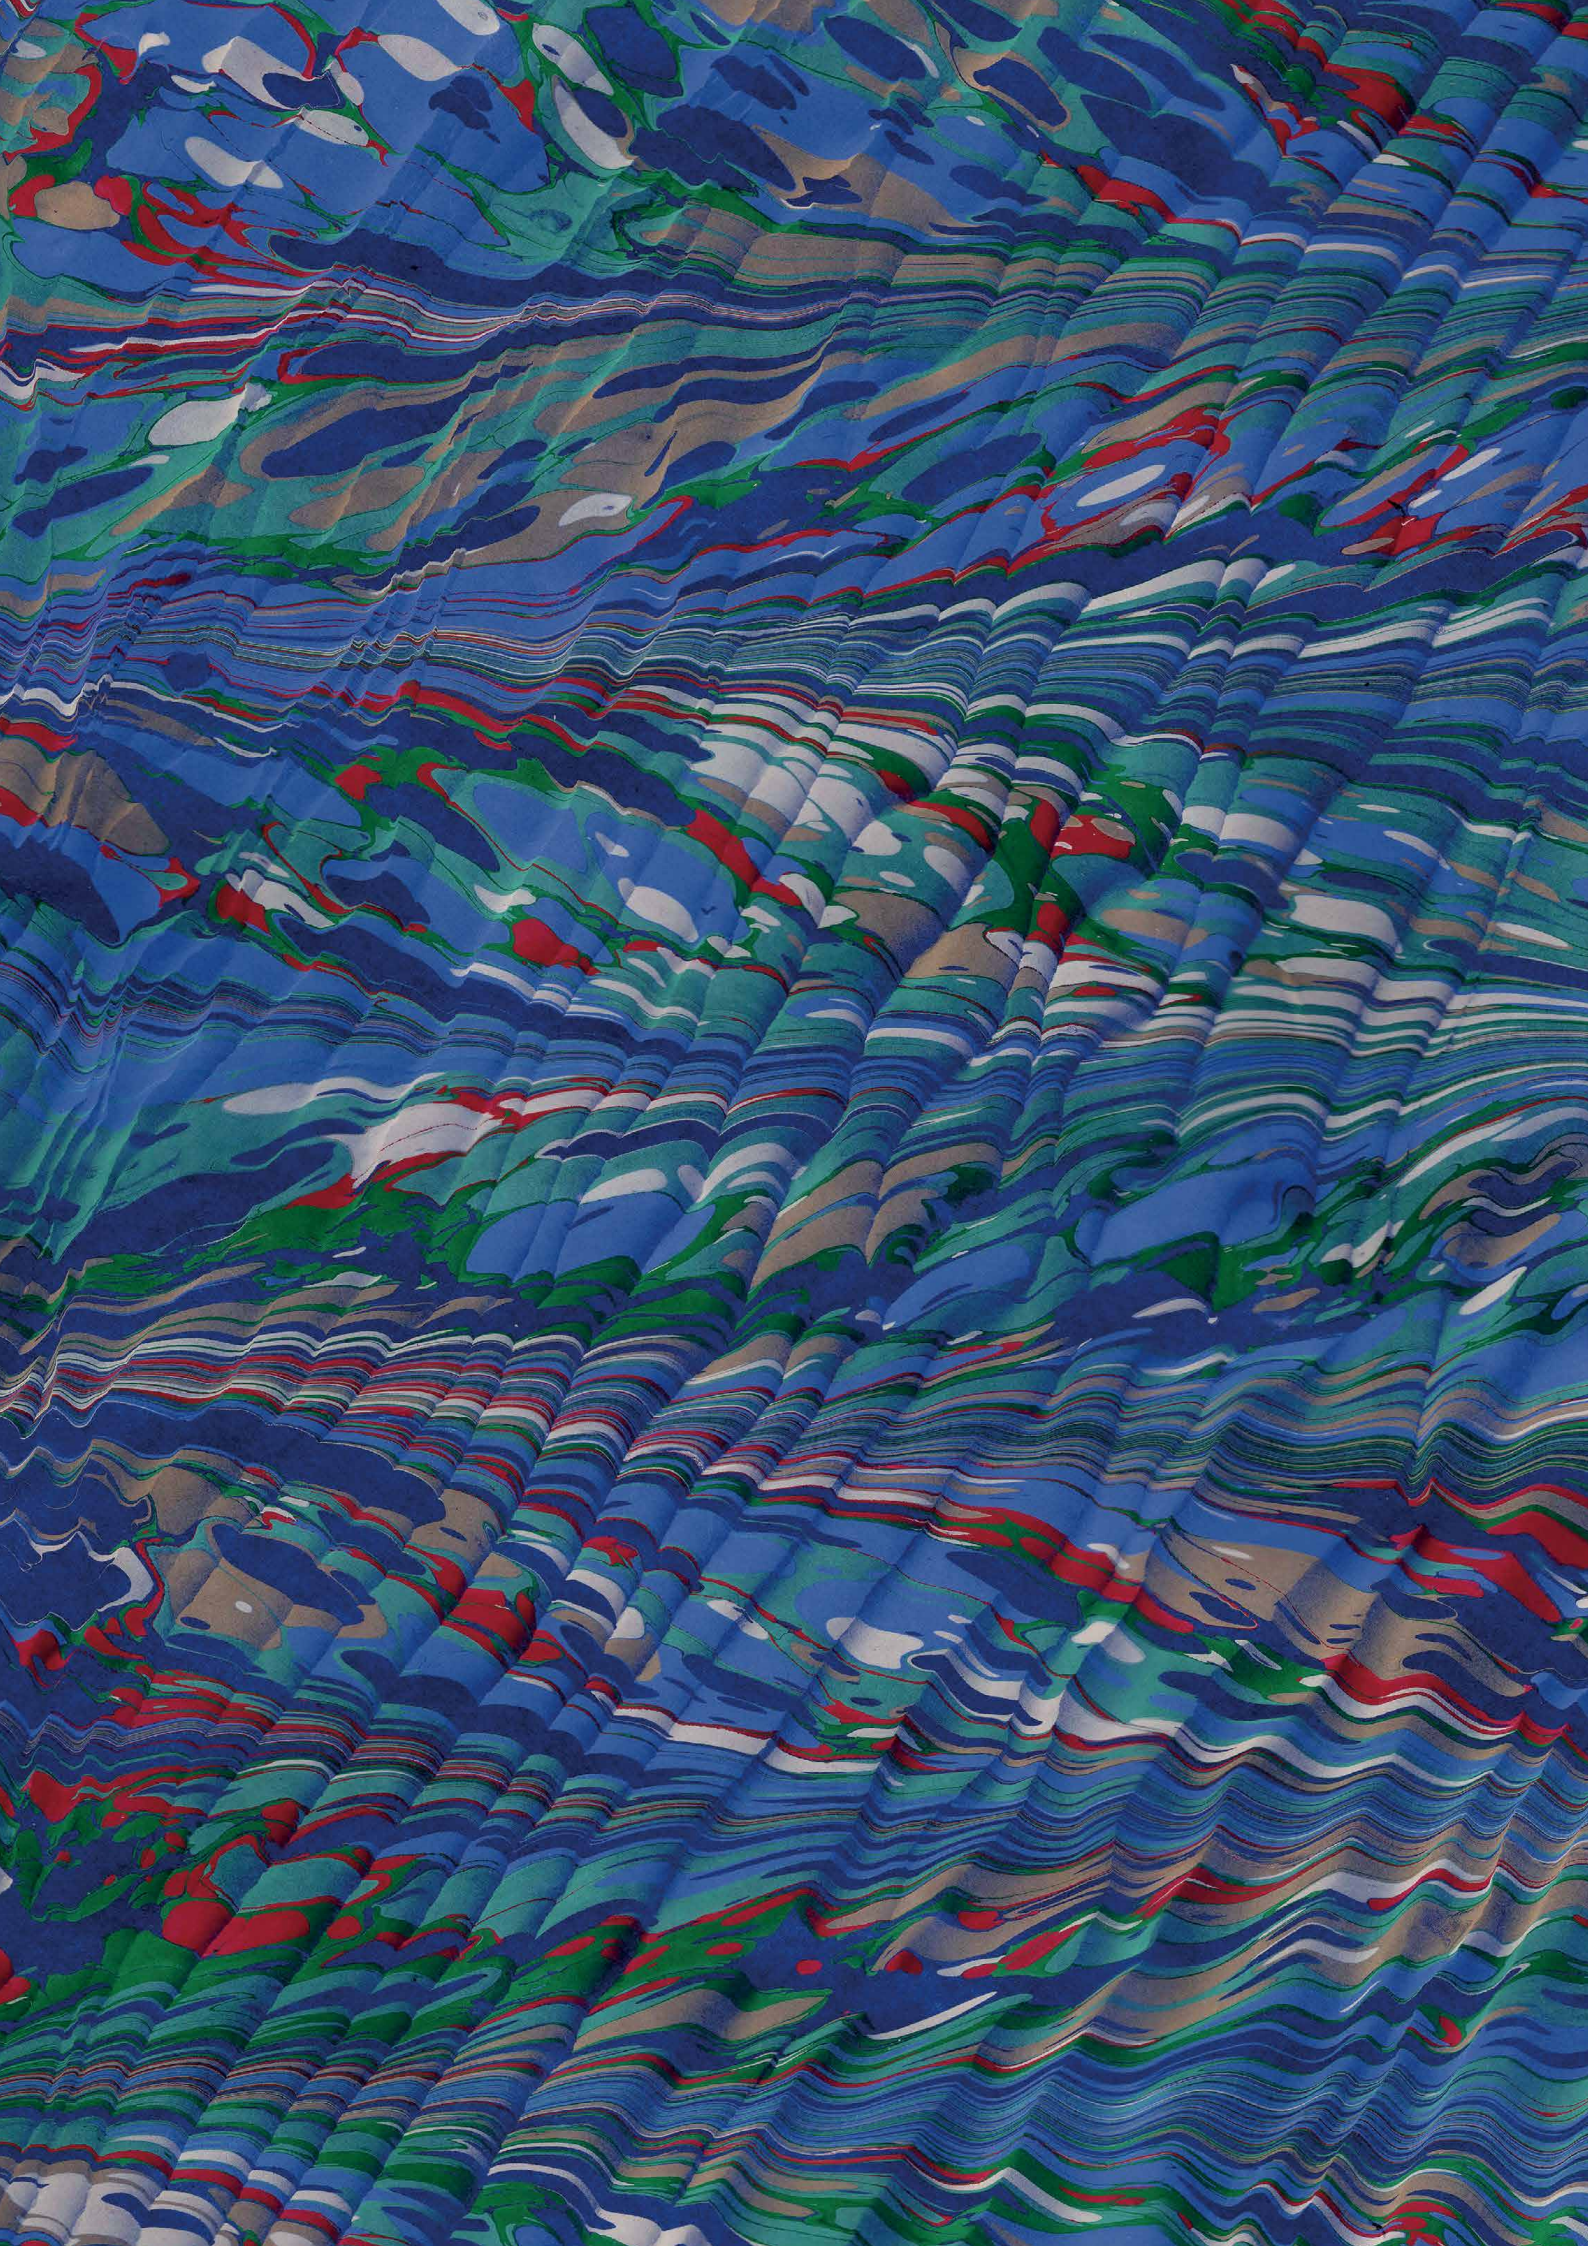

THE TOOLSET

WE MAKE TOOLS TO INSPIRE CREATIVITY AND REIMAGINE THE EVERYDAY

Makers Cabinet was founded in 2017 by a team of designers, Odin Ardagh, Benjamin Weininger and Noah Bier. They met studying Product Design at Central Saint Martins and were dissatisfied with the disposable and wasteful nature of the stationery market, spurring a desire for change.

It began with a simple idea, reimagining the way we sharpen pencils. Since then, they have disrupted the stationery market with their range of heirloom quality tools, elevating the drawing and writing experience. Pioneering in a resurgence of well-made premium stationery.

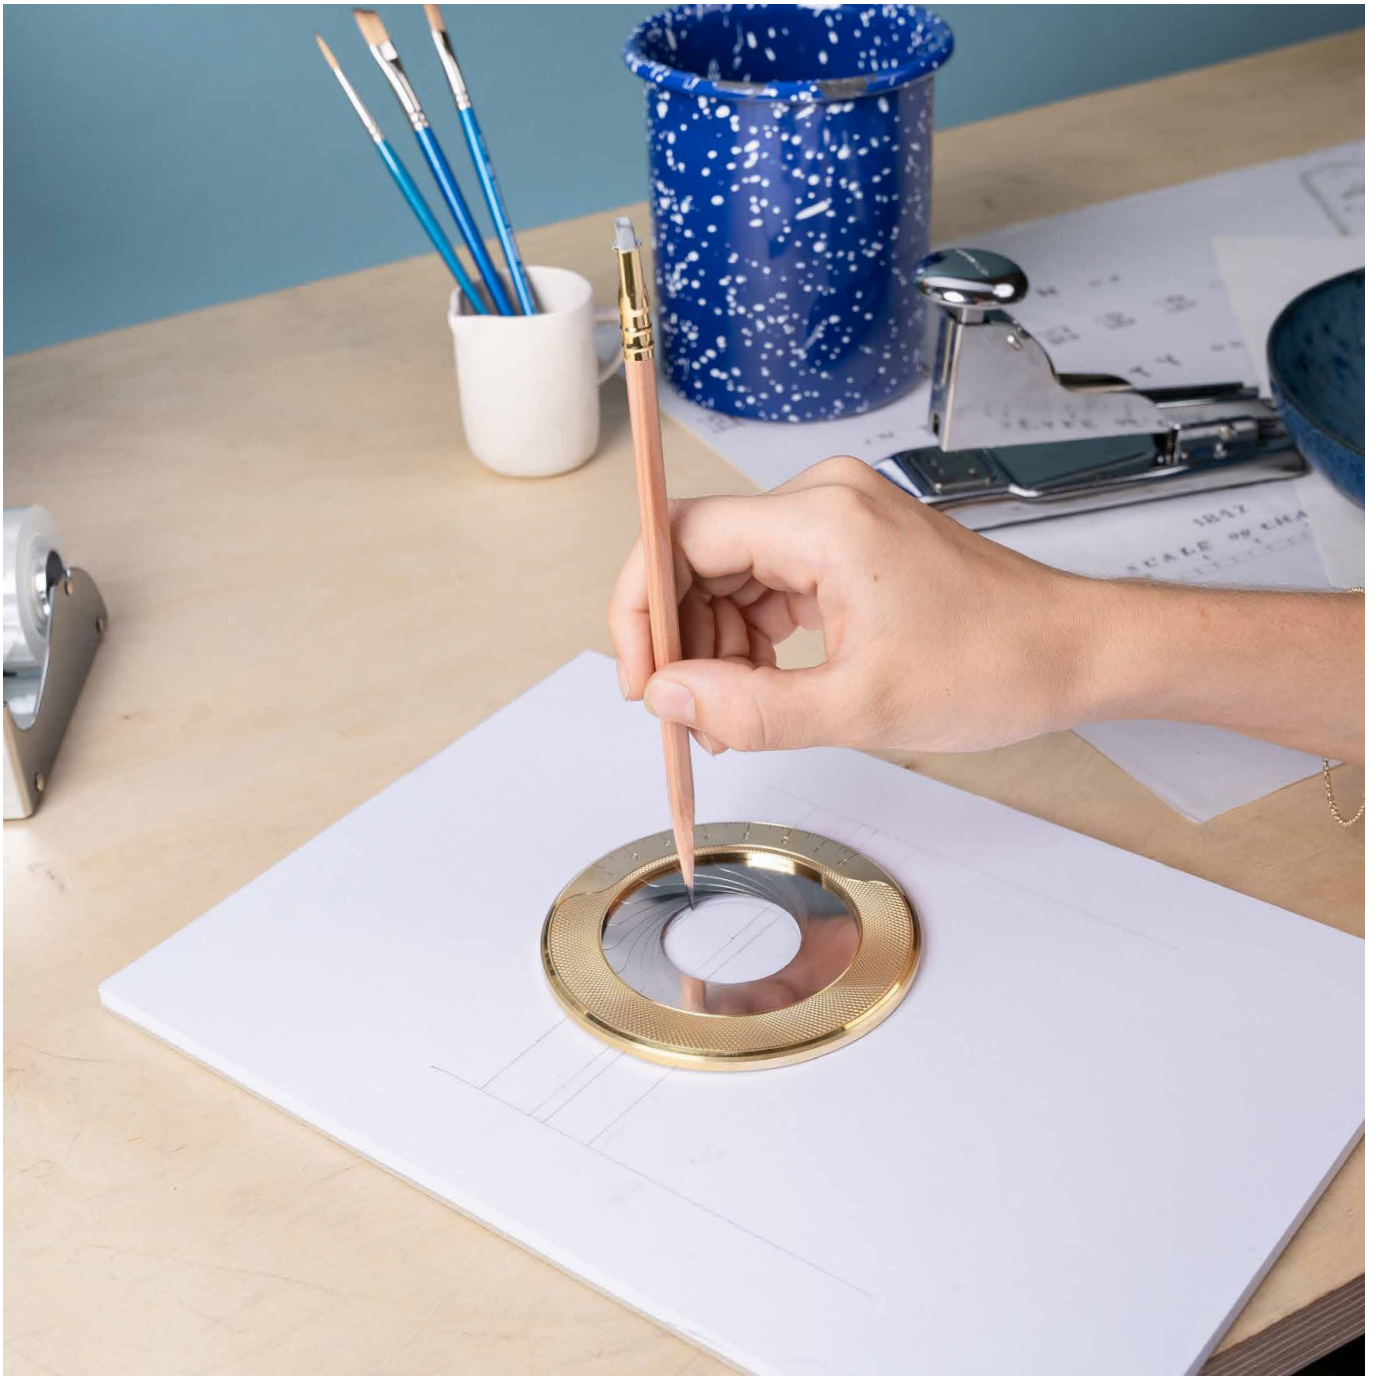

TOOLS

Makers Cabinet has created a coveted range of premium stationery products, systematically revitalising utilitarian desk tools. Driven by close attention to quality and detail, our primary ambition is to design tools that inspire creativity and last generations. The products age gracefully; they 'wear in, not out'. We utilise the highest quality materials, processes and finishes when producing our products. With our drive for innovative and high-quality design, we elevate humble everyday tasks to inspirational moments.

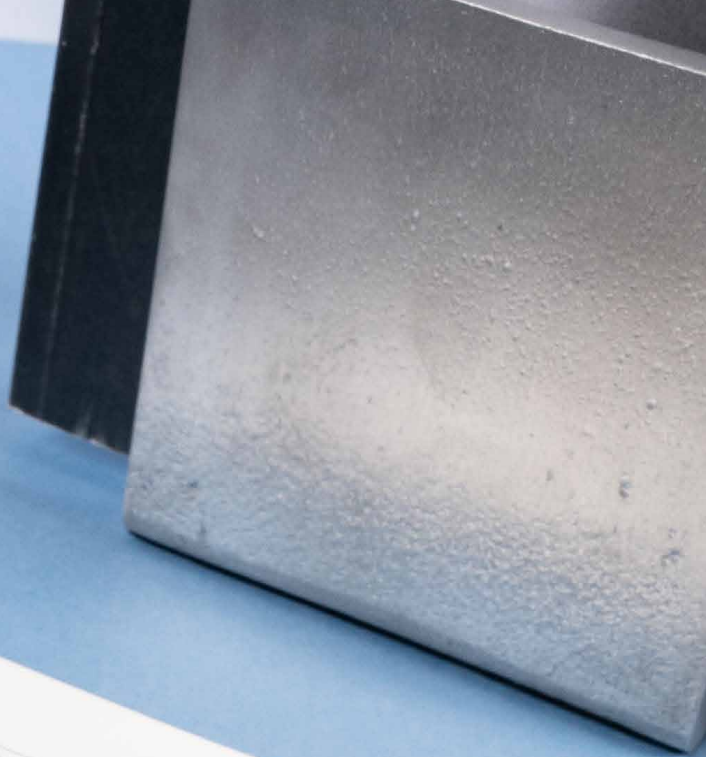

IRIS

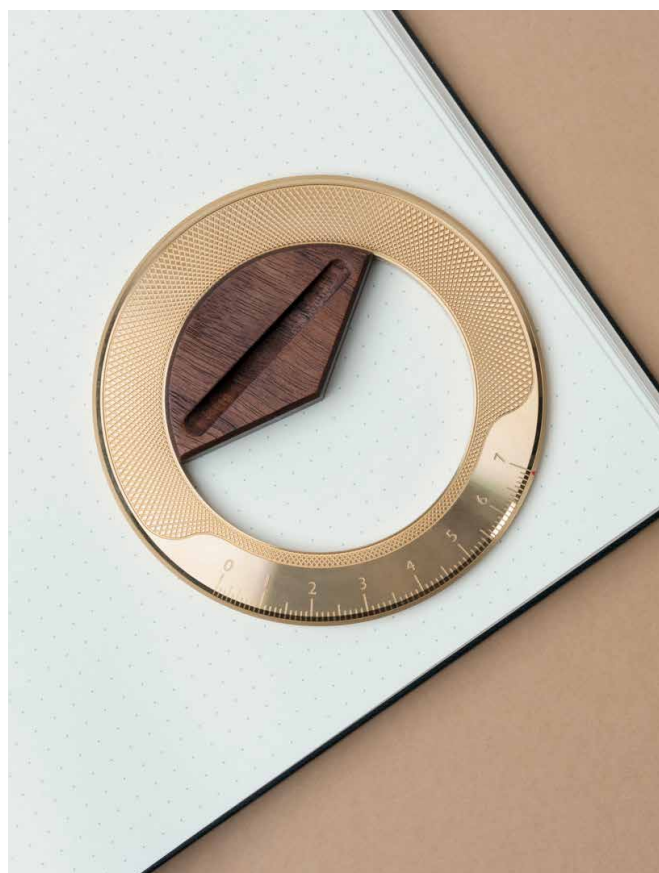

Our best-selling product, Iris, is a scalable circular drawing tool inspired by the aperture of a camera lens. Iris allows you the freedom to draw single, concentric and shaded circles with its rotating stainless steel leaves and solid brass body.

Precisely measure the diameter of circles and gauge objects freely with the metric scale engraved into Iris. Each Iris comes with a walnut centring tool that can be used to locate a centre point and doubles as a stand to stylishly display Iris.

WEIGHT	220g
MATERIAL	Solid brass, stainless steel leaves, natural rubber mat, American walnut
FINISH	Mirror polish with engraved texture for grip and metric diameter scale
PRODUCTION	Machined in Shenzhen, China

INCLUDED

- Walnut base /centring tool
- Instruction leaflet

MORE

- Leather Sheath

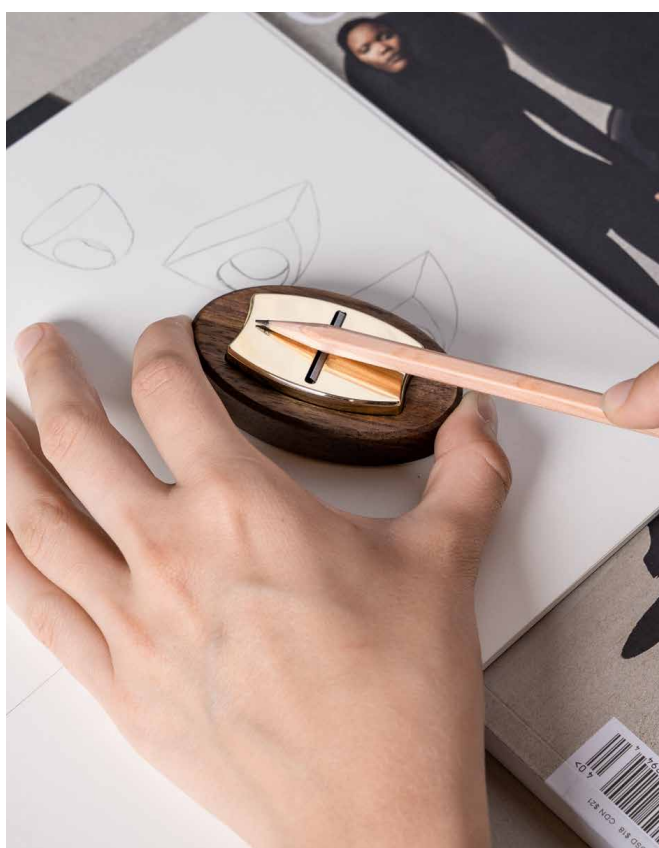

Inspired by traditional woodworking planes, the award-winning Høvel is an entirely reimagined pencil sharpener. Machined from solid brass, the pencil plane enables you to achieve any perfectly crafted point. The weight of Høvel's solid brass body makes it a pleasure to handle. It will gain beauty and character with time and use. By simply turning the thumbscrew, Høvel's blades can be safely changed or adjusted. Customise your pencil

sharpening experience by adjusting the clamp to allow for deeper or shallower cuts. Høvel's unique mechanism prevents you from breaking the lead of your pencil. Høvel can be used on any shape wood-cased pencil including graphite, charcoal, pastel or makeup. It's hand-finished to a mirror polish and arrives in a durable and recyclable card box with 10 carbon steel replacement blades.

WEIGHT	130g
MATERIAL	Solid brass
FINISH	Mirror polished with sand blasted detailing
PRODUCTION	Machined in Shenzhen, China

INCLUDED

- 10 Carbon steel replacement blades
- Instruction leaflet

MORE

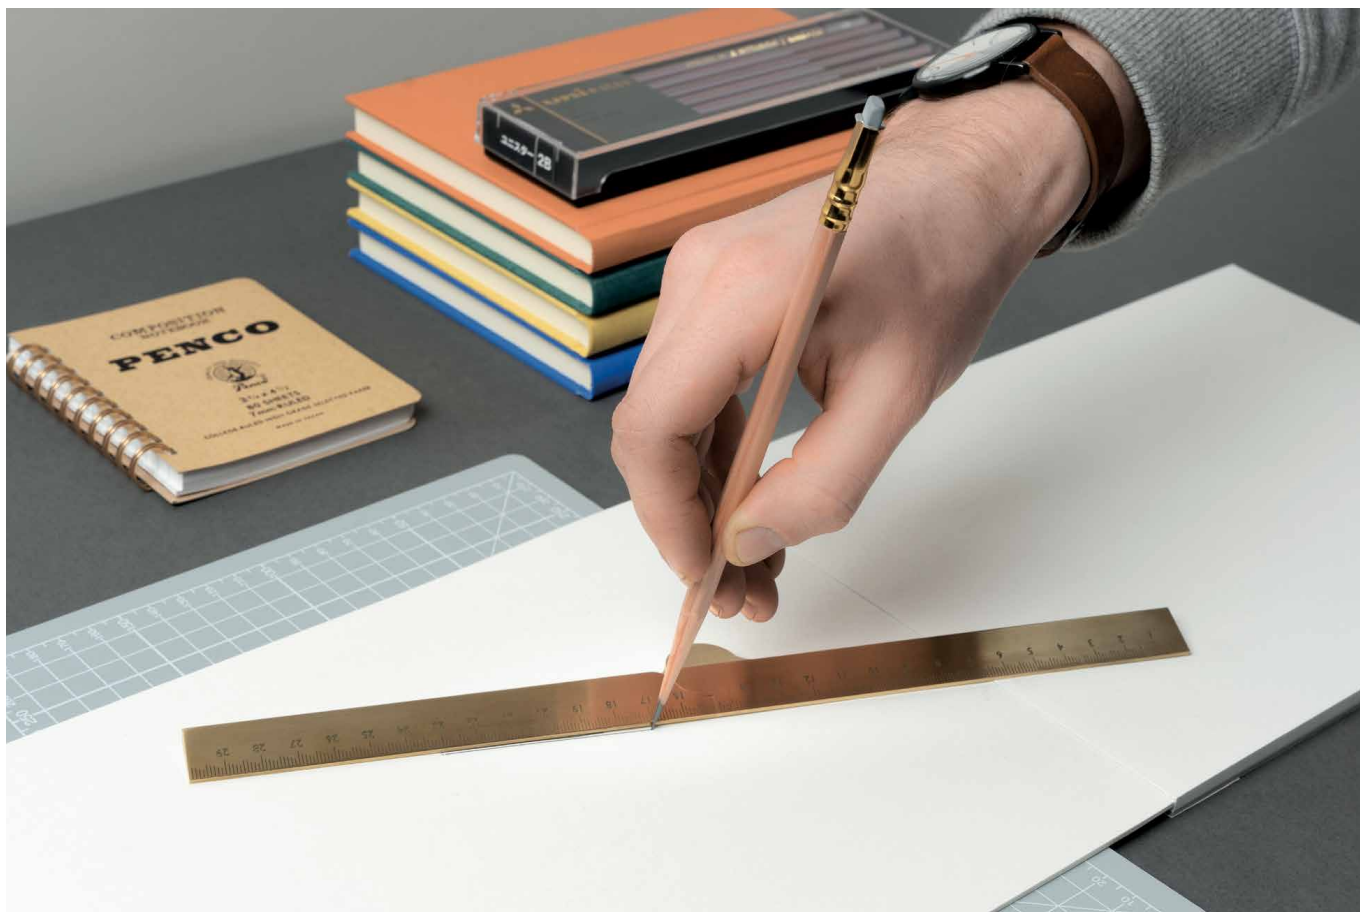

- Walnut Wooden Base
- Leather Sheath
- Replacement Blades

Stria is an elegant folding ruler designed to have both unparalleled function and style. The ruler's weight allows it to securely lay on your page as you easily draw straight lines. Its one-of-a-kind dovetail hinge enables it to extend up to 30cm. Stria also features an innovative haptic-click mechanism to indicate when its arm reaches 45°, 90°, and 135°. Its angled face provides support for control when drawing

and cutting. The Stria comes with a thumbscrew which enables you to adjust the resistance of the hinge. Measurement scales feature metric and imperial on either side. Stria can be easily disassembled for cleaning and maintenance. Like with all of Makers Cabinet products, this innovative mechanism will enable Stria to be used for generations. Stria's thumbscrew can be stowed securely in your Høvel.

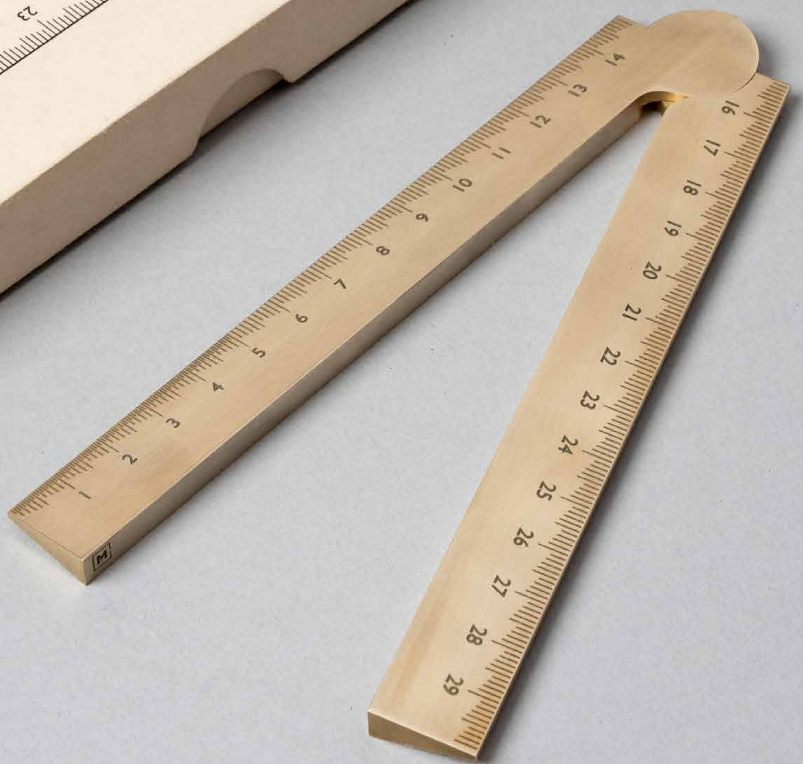

WEIGHT	227g
MATERIAL	Solid brass
FINISH	Lightly brushed with sand blasted detailing
PRODUCTION	Machined in Shenzhen, China

INCLUDED

- Adjustment thumbscrew
- Instruction leaflet

- Leather Sheath

FERRULE

Ferrule, our latest innovation, is a pencil holder made to extend the life of your pencil while elevating it to the quality found in premium pen design. Our pencil extender, built around a brass collet with a double helix clutch mechanism, twists and secures pencils in place. Ferrule is machined from a brass body and fits round, hex and square pencils ranging from 7-8mm in diameter, including graphite, charcoal, pastel or makeup pencils. Featuring a steel clip which

can be removed for a more minimal aesthetic. Ferrule includes 6 high-quality graphite pencils and 3 erasers which are secured in the top and bottom of its body, extending their longevity and reducing waste. The pencils are made in partnership with Kitaboshi in Japan, renowned for their experience and quality manufacturing.

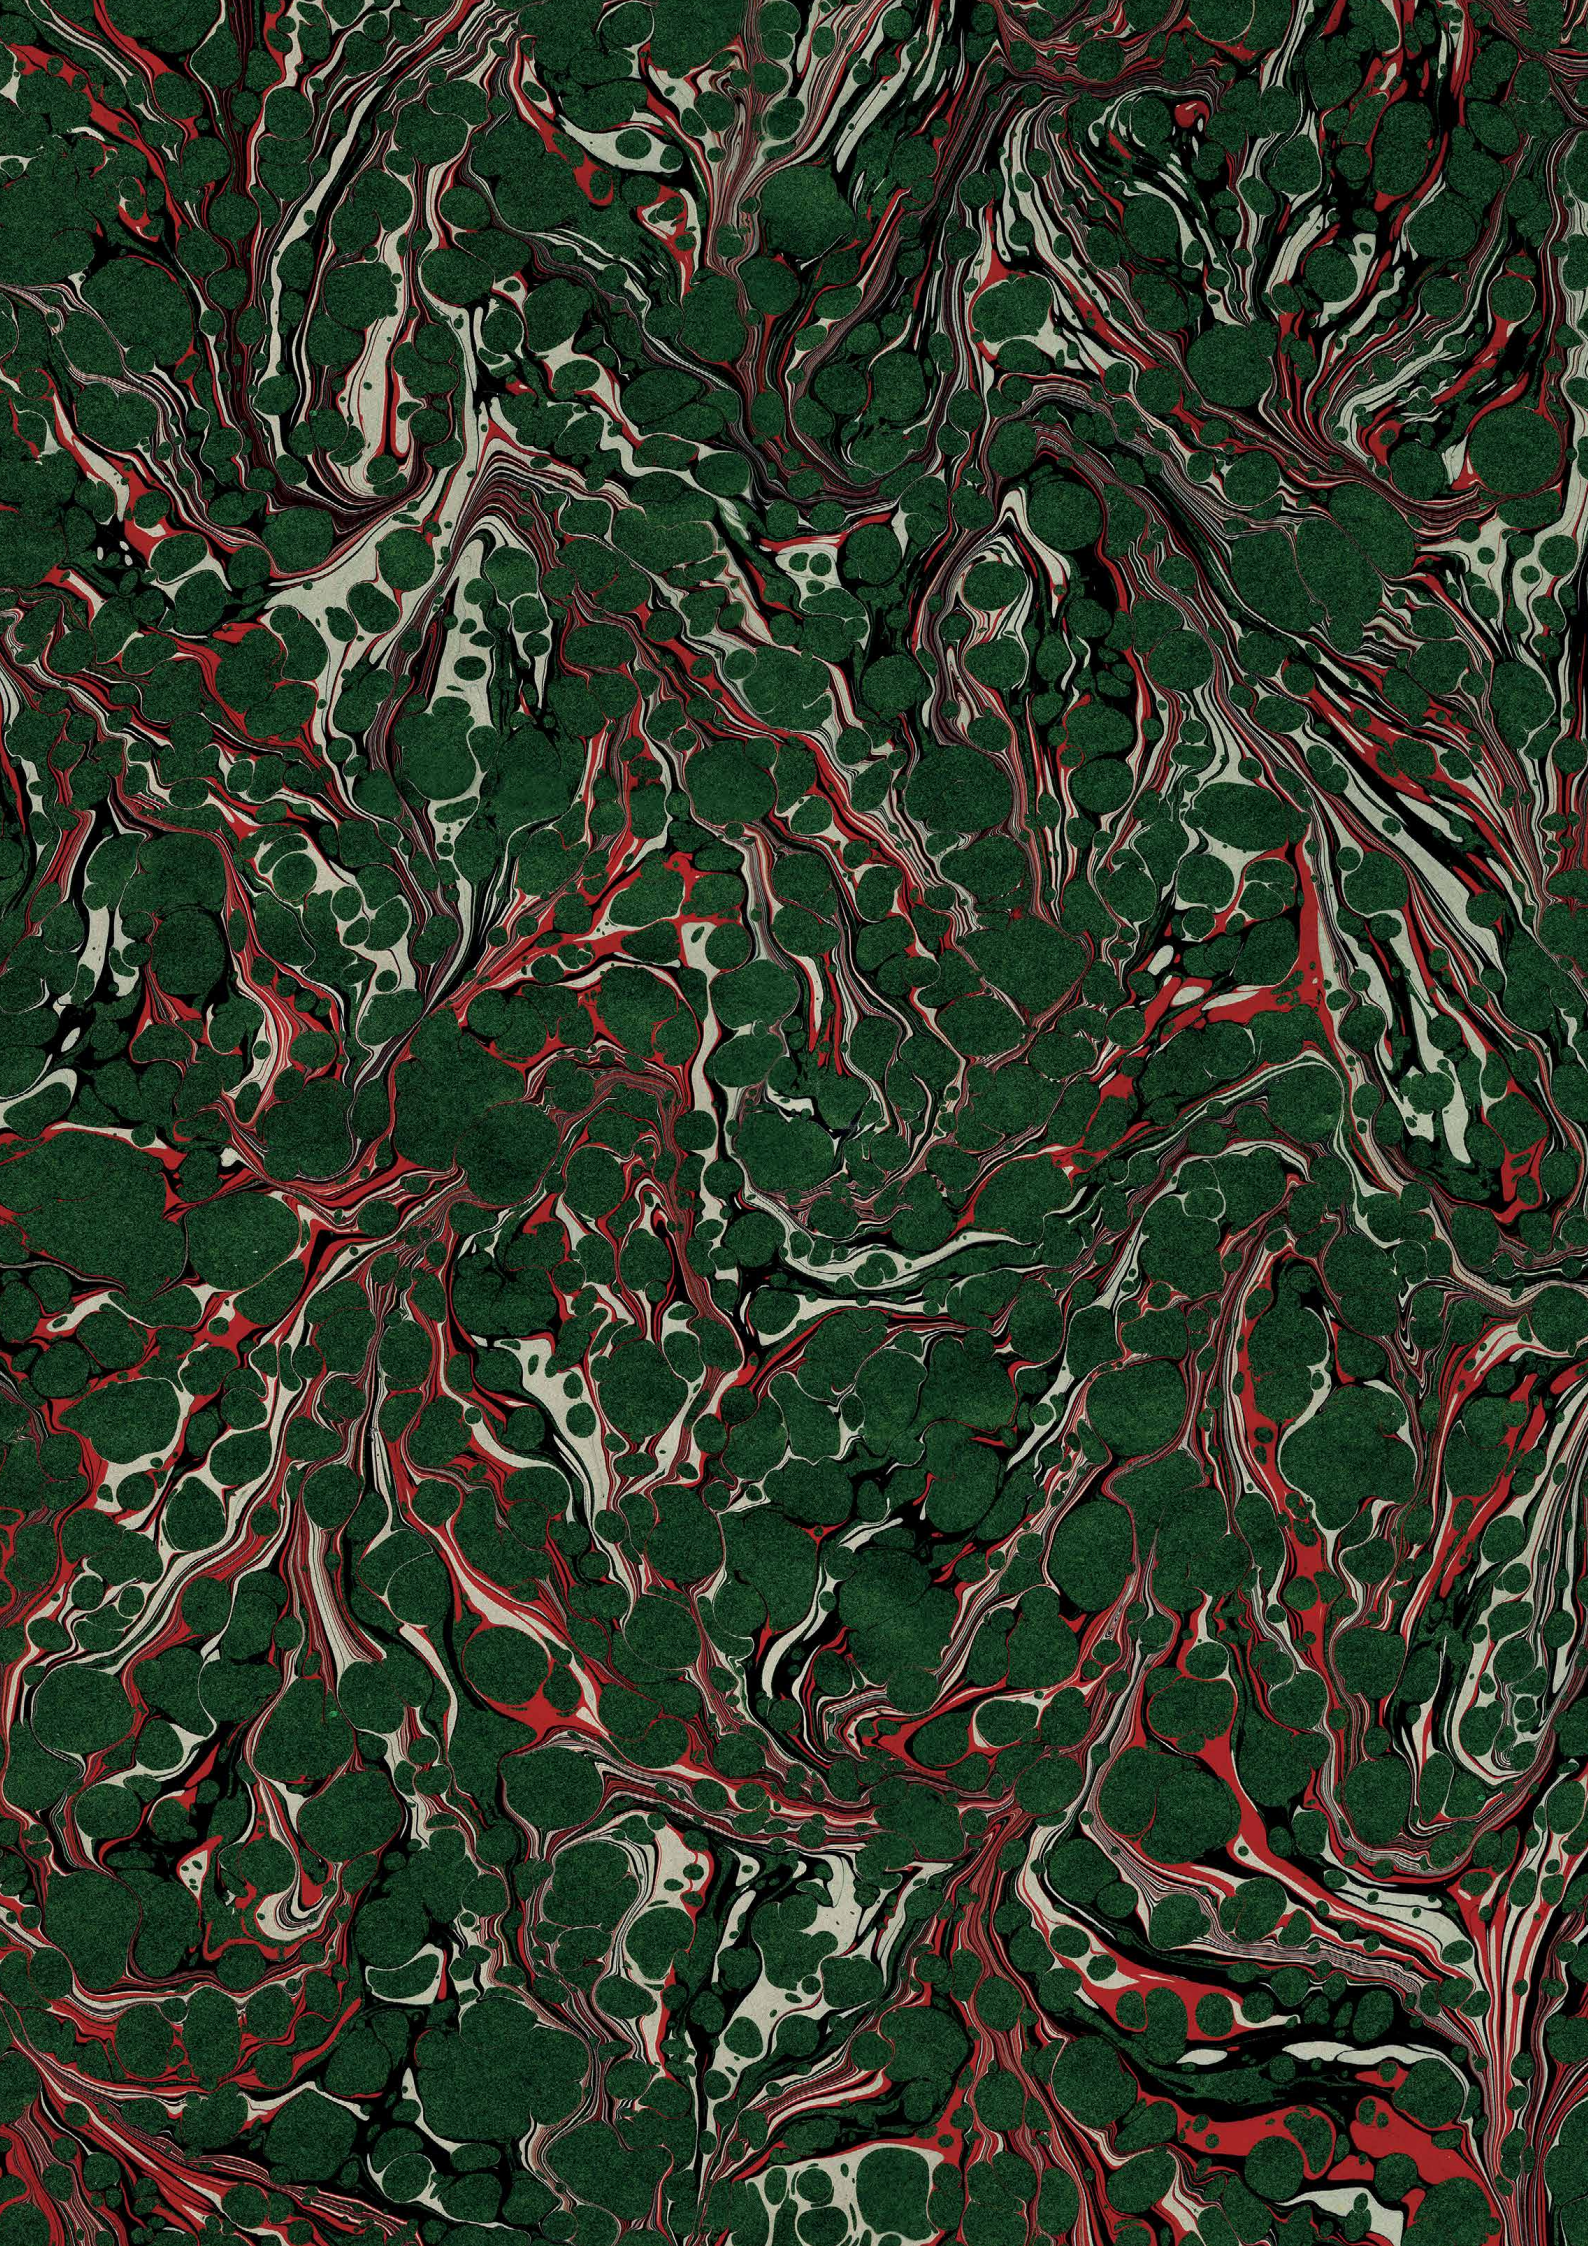

WEIGHT	250g
MATERIAL	Solid brass & stainless steel
FINISH	Radially brushed
PRODUCTION	Machined in Shenzhen, China Refills made in Japan

INCLUDED

- 3 2B & 3 HB pencils
- 3 erasers
- Instruction leaflet

MORE

- Pencil Refills 2B & HB
- Eraser Refills
- Leather Sheath

ACCESSORIES

SHEATH WEIGHT	Iris – 45g Høvel – 30g Ferrule – 25g Stria – 40g
MATERIAL	Premium Badlassi Carlo leather tanned in Italy
FINISH	Vegetable tanned
PRODUCTION	Made in Italy

TOOL SHEATHS

The tool sheaths provide protection whilst stored or on the go. Made from premium leather in Italy, they will age gracefully and gain a unique patina while holding your tools tightly.

WEIGHT	30g
MATERIAL	American walnut
FINISH	Polished & sanded
PRODUCTION	Machined in Shenzhen, China

HØVEL BASE

The perfect companion for Høvel. The walnut wooden base functions as a chamber for shavings while you sharpen and looks great on any desk.

WEIGHT	8g
MATERIAL	Carbon steel
PRODUCTION	Machined in Shenzhen, China

BLADES

10 carbon steel replacement blades ensuring Høvel stays sharp. Each blade should last roughly a month of consistent sharpening and are recyclable after use.

REFINING

At Makers Cabinet we merge traditional craft processes with modern tools such as 3D printing and CNC milling. Led by head designer, Odin, our engineering team works to ensure Makers Cabinet's high production standards and consistently deliver the best quality products for our customers.

Our design values translate into our visual language. We create all of our own content and commission creatives with a common mindset, building a community of makers. We apply the same ethos to our packaging as we express in our products, reaching the highest standards in design and sustainability.
