RECYCLED  
SUNGLASSES**

# POM'S EXCLUSIVE RANGE OF RECYCLED POLYCARBONATE SUNGLASSES

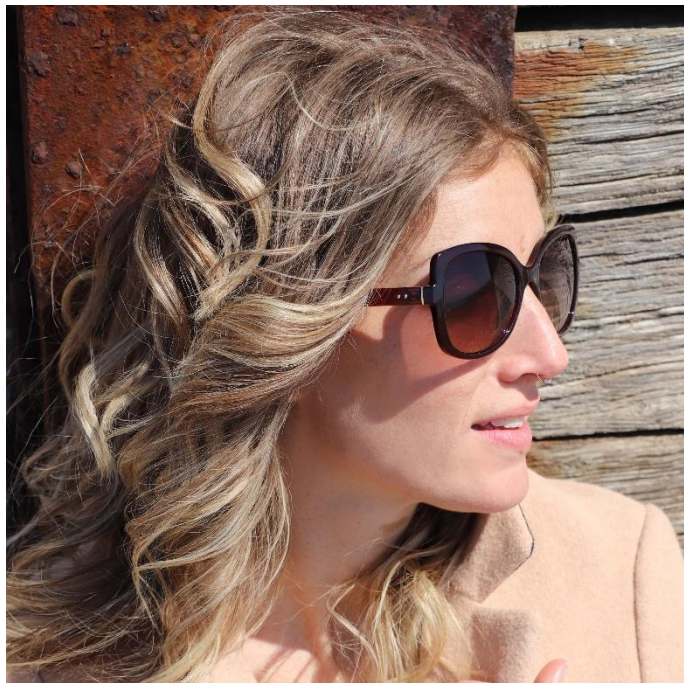

Both the frames and the lenses of our glasses are made from recycled polycarbonate. This polymer is a manufacturing material widely used in the optics industry generating much waste, such as the disposable polycarbonate demo lens or crystals used in showrooms, or the scraps and shavings resulting from their cutting.

PoM sunglasses come presented in a card based paper covered box, which is fully recyclable and biodegradable. We even wanted a more sustainable way of packaging these, so this is why each pair of sunglasses come wrapped in a recycled polyester cleaning cloth completely doing away with any need for a plastic bag.

We even considered sustainability when it came to display, our Sunglasses stand is made from Bamboo, which is one of the most sustainable materials on the planet, it is self regenerating, really fast growing and needs little watering, making it completely sustainable.

We have chosen 5 different designs that will appeal to all tastes – providing options for all and the ideal sustainable gift...

All styles  
are CAT3  
UV400  
protection
