# COR-TEN

Weathering steel, designed to rust

For all our products we use COR-TEN steel, a material commonly used for architectural works and sculptures.

2 Weeks

COR-TEN is designed to rust. The beautiful rust patina that forms acts as a protective barrier which prevents unwanted corrosion from taking place and stops your new artwork from becoming brittle or deteriorating over time.

6 Months

This means that you can enjoy our motifs for not just years, but DECADES!
