Wholesale Catalogue 
2024

Introduction

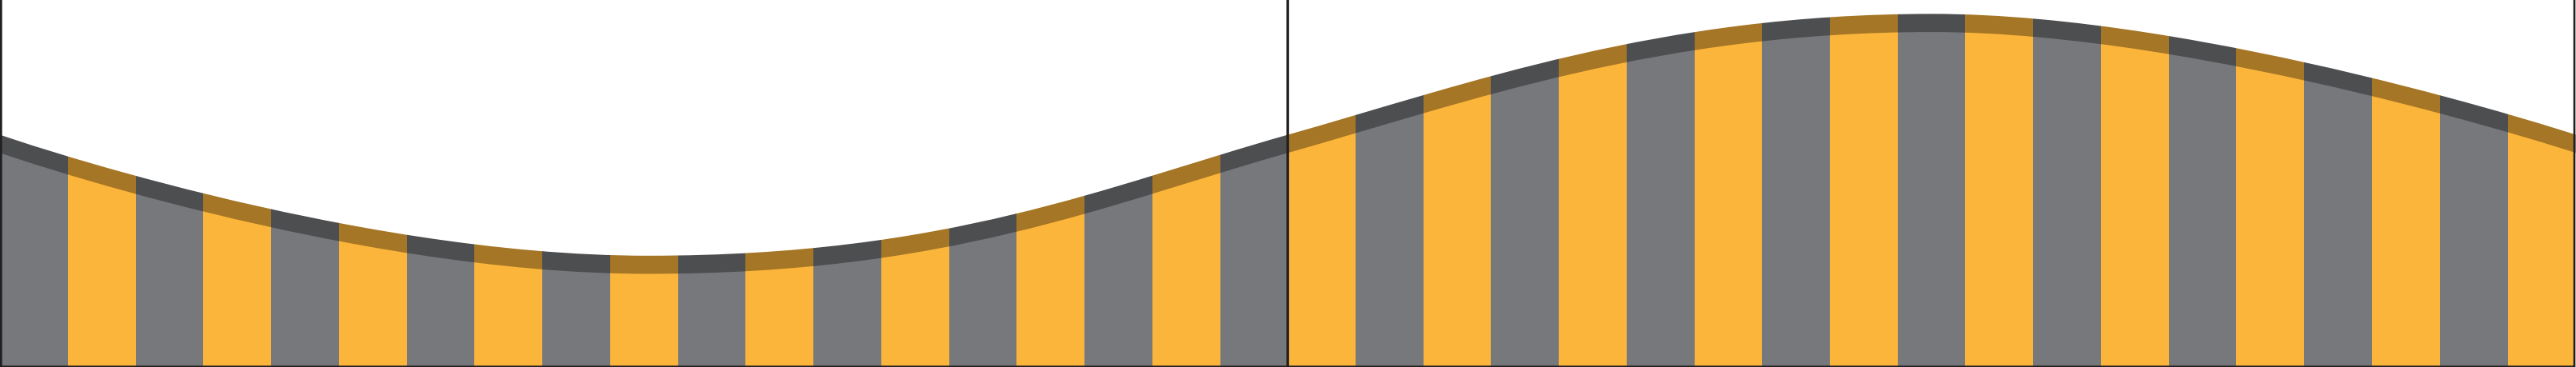

Urbee is a company with an aim, not only to design and provide lovely products for people, homes and gardens, but to also raise awareness of how important bees and other pollinating insects are to our environment and survival.

The aim is to have as many products made in the UK as possible. Supporting our British economy is essential, and sustainability is a key target. We are always striving to find ways to be more environmentally friendly and reduce any impact on the planet.

Also proud to be member of **Ecologi** - helping to fund tree-planting and carbon offset projects across the world.

We appreciate the need more than ever to have natural habitats around us. Places where bees can forage and thrive. Places where they can keep doing what they are on this earth to do.

Through our products we hope to aid in their conservation by not only raising awareness but by also donating 10% percent of all profits to **Buglife** - the only organisation in Europe devoted to the conservation of all invertebrates.

The Bee Box

Our exciting new product, the 'Bee Box' is for primary school-aged children, helping them to learn, create and grow for bees*.

Bee Box aims to encourage children to step outside and look at bees, learn about their differences and to engage with their conservation by making things outside or growing plants.

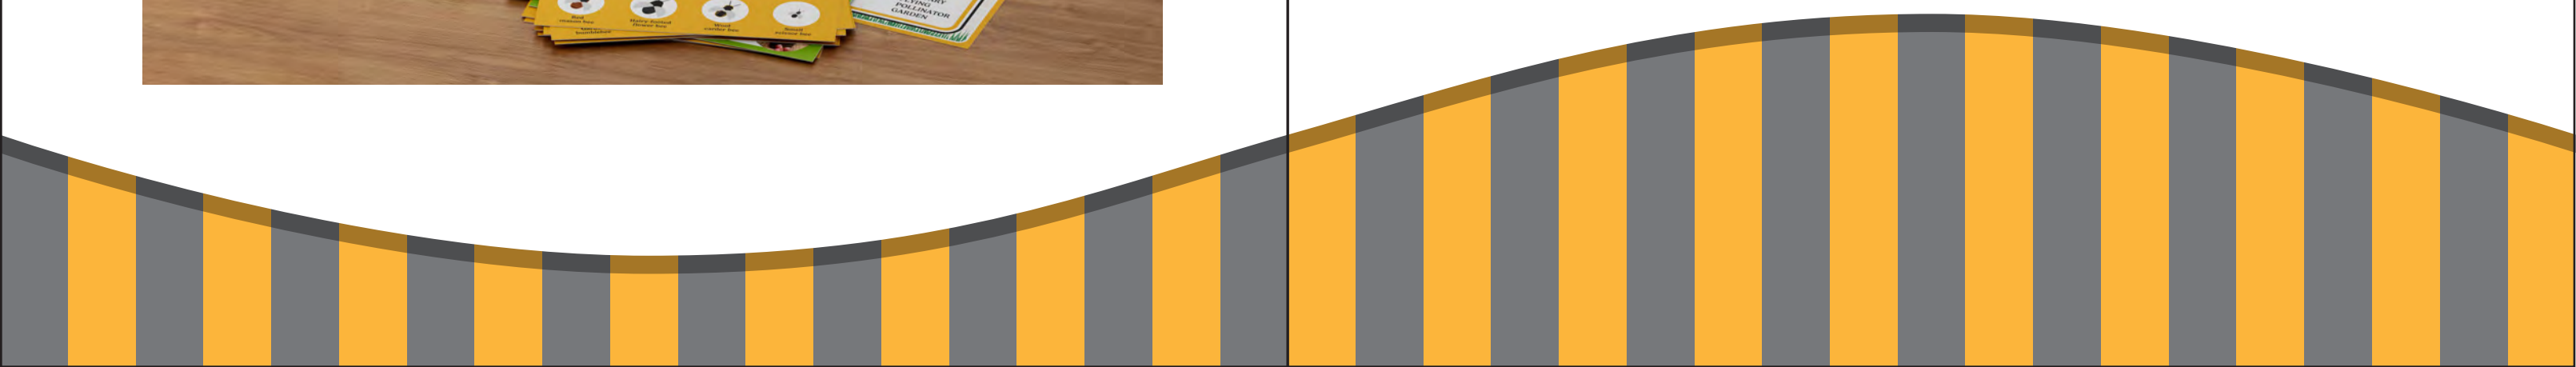

- The Bee Box is endorsed by Buglife and contains:
- Bee ID cards for 8 common bumblebees and 8 solitary bee species.
 - Information cards to help children learn about the different types of bees.
 - Activity cards with 'Bee tasks' so they can make things or grow seeds/plants
 - Seedballs® with native wildflowers that bees love
 - Bee sketch book to draw and illustrate their findings.
 - Colour-in bookmark.
 - Set of colouring pencils.
 - Fun activity sheet to test all their buzzy knowledge.

Children's 'top tips' to help others gain success in the tasks, which can be found throughout the activity cards. All information given has been family 'tried and tested'.

"The Bee Box is a delightful gift to share with the children in your life as it is full of engaging information, puzzles and more to engage them with our precious pollinators. We need to save our bees but to do this we must first love them. The Bee Box is an ideal way to grow that love in future generations."

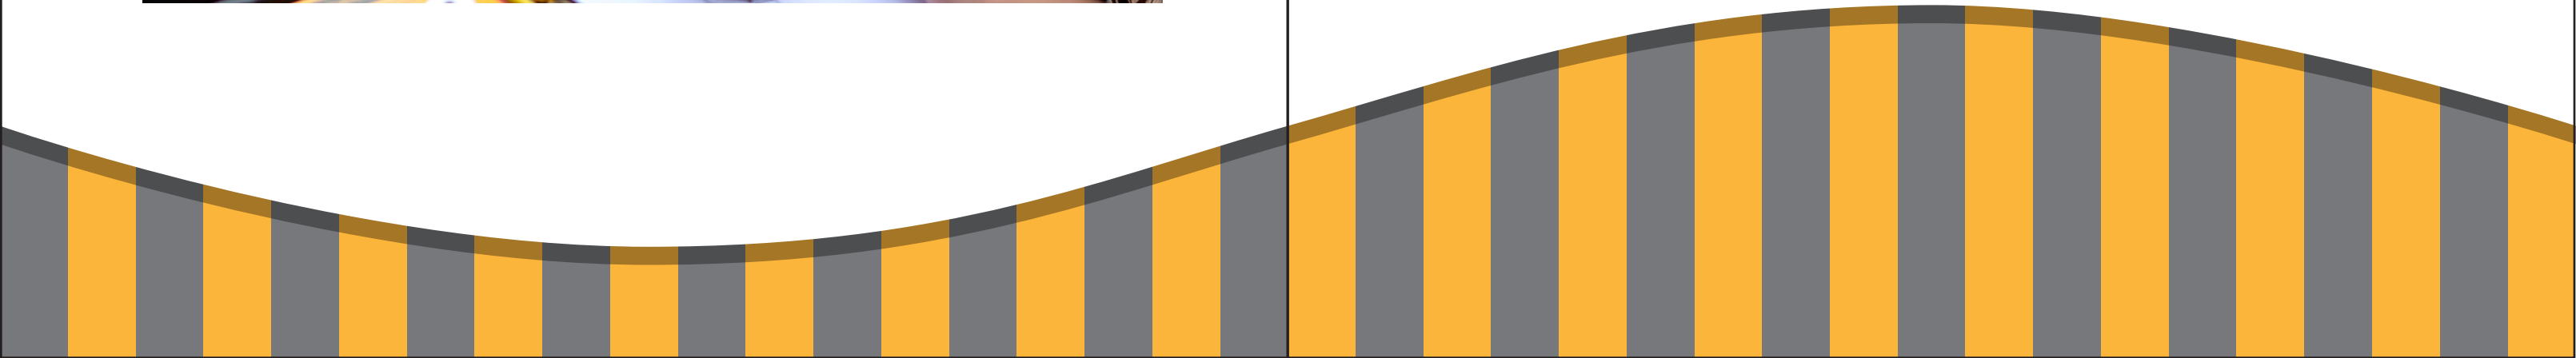

Paul Hetherington, Buglife the Invertebrate Conservation Trust.

Info & Sustainability

Bee Box and its entire contents are proudly made in Great Britain, using recycled paper and sustainably sourced materials. Everything in the box is recyclable, and digitally printed onto carbon offset papers and boards that are 100% recycled and printed with eco-friendly inks.

Note/Sketch Books & Pencils

'Urbee & Friends' is our eco-friendly kids range. Our colourful stationery sets will help children to learn, with an interesting fact about UK pollinators on the back of each book. One book is lined for writing and notes, the other book is plain for drawings and doodles (both held together with a belly band).

Info & Sustainability

Our mugs are made and hand-decorated in the UK's Staffordshire potteries. We are proud to support our British heritage and business.

The pottery where some of our mugs are made has been manufacturing British fine bone china since 1888. They have passed their traditional skills down through generations of potters.

We don't use any imported china in the production of our mugs - which in turn reduces our carbon footprint.

Recycled kraft presentation boxes available at a small extra cost.

Conservation

Since 2020, donations to Buglife have been used to purchase wildflower seed to create pollinator habitat across the UK!

"The **B-Lines** are a series of 'insect pathways' running through our countryside and towns, along which we are restoring and creating a series of wildflower-rich habitat stepping stones. They link existing wildlife areas together, creating a network, like a railway, that will weave across the British landscape. This will provide large areas of brand new habitat benefiting bees and butterflies, and also a host of other wildlife".
